- X (BSE) | Sri Chaitanya Techno School, Nandyal   CGPA: 9.5 | (Jul 2017 - Mar 2018)

PROJECTS
- **Portfolio |** View Code on GitHub |View Website
  Create a responsive portfolio website using HTML, CSS, and JavaScript to effectively showcase your skills, projects, and professional experiences. This dynamic platform allows you to easily integrate your resume, making it accessible to potential employers and clients on any device.
- **E-Commerce with Advanced Filtering System |** View Code on GitHub | View Website
  Built an advanced, dynamic filtering system in ReactJS for an e-commerce platform, allowing users to search products by categories, price range, and color. Designed an intuitive interface showcasing product details like images, prices, and ratings to enrich user experience.
- **APIs based Currency Converter |** View Code on GitHub | View Website
  Created a responsive currency converter application with real-time exchange rates via API integration, supporting multiple currencies. Implemented precise conversion logic for accurate calculations, ensuring a seamless user experience across devices.
- **Music Player |** View Code on GitHub | View Website
  Developed a responsive music player using HTML, CSS, and primarily JavaScript, featuring dynamic HTML generation for seamless interaction. Integrated essential functionalities including play, pause, previous, next, shuffle, sorting, delete, and reset buttons, offering a comprehensive and engaging user experience across devices.
